WATER RESOURCE STAFF & SENIOR ENGINEERS JOB ANNOUNCEMENT

OUR COMMUNITY

Our “Incredible County” is one of the fastest growing affluent communities in Ohio and was recently ranked the Top County for economic growth in the greater Cincinnati area. Nestled between the bustling Cities of Cincinnati and Dayton, the County is home to the communities of Mason, Lebanon, Springboro, and Waynesville. We are proud to be Ohio’s Largest Playground drawing visitors throughout the tristate area to major attractions including the Kings Island amusement park, the Western & Southern tennis tournament, the Little Miami state and national scenic river, world class sports facilities, and the Fort Ancient prehistoric earthworks and nature preserve. The County is supported by excellent school systems, reasonable tax rates, and is home to vibrant, energetic, young professionals. It truly is a great community for work and play!

WHO WE ARE

The Warren County Water and Sewer Department is a regional water supplier that builds and operates world-class treatment facilities providing safe and reliable drinking water to our customers. The County owns and operates two water treatment plants with a total rated capacity of 24 million gallons per day serving over 34,000 water customers. We maintain 750 miles of water mains, 1,500 main line valves, and 6,500 fire hydrants.

The department also operates five wastewater treatment plants serving over 25,000 sewer customers. We maintain over 340 miles of sanitary sewers and over 70 lift stations.

The department operates with a 50 million dollar budget that covers expenses and capital projects. Warren County Water and Sewer has it's own finance division along with a customer service , geographic information system, backflow prevention division, engineering, and instrument and controls divisions.

We encourage you to imagine your career with Warren County Water and Sewer. Be part of a team of over 80 employees who are dedicated to providing the County residents with the best service possible.

EDUCATION & EXPERIENCE

Entry level staff engineering position requires a bachelor's degree in civil, chemical, environmental, or mechanical engineering. Experience and knowledge of AutoCad and ESRI ArcMap software is desired. Candidates that have passed their Fundamentals of Engineering exam are preferred.

Senior engineer & project manager candidates shall have an active professional engineering license. Candidates with a master's degree in engineering or business administration are preferred.

Nanofiltration treatment process at the Richard Renneker Water Plant
